

Welcome to Cyber Monday, your weekly guide to how you can help and support your child to stay safe online.

Keeping children safe is paramount to all that we do at Marshside Primary School: our Computing and wider curriculum has E-Safety embedded throughout all topics.

As a school we want our children to be confident and competent digital citizens and this also extends to how we can support our families in ensuring children are safe when using the internet. We recognise that most online usage is at home and can be daunting especially with the amount of Apps, on-line games and Social Media children encounter, which is why we have created this guide!

This week we will be focusing upon Early Years and KS1 with guidance published by the National Crime Agency.

Click the link and watch the video – it also gives handy top tips as to how you can keep your child safer online and where you can report concerns.

We hope you find it useful,

Thank you,

Miss Hornby.

Computing Subject Leader.
